

1. **Background** (5 points)

What does this protein do? What ligands/coenzymes are required for its activity?

2. **Content** (25 points)

What different aspects of protein structure were presented in the talk?

With what slides was the rendering of the protein structure clear?

With what slides was the rendering scheme unclear?

Were any of the slides unnecessarily busy or confusing?

3. **Speaking Quality** (10 points)

Was the presenter an expert on this protein structure?

Were images and figures clearly explained?

Was the presentation spoken in a clear, understandable manner?

4. **Style** (10 points)

Were text slides used where pictures would be more appropriate?

Was the purpose of each slide clearly indicated?

What is the outline for the talk?
